

# Empower your clinical teams with cutting-edge cloud technology

Australian designed and built, MediRecords is an industry-leading, cloud-hosted electronic health record and patient management system.

## About MediRecords

MediRecords is used by doctors, specialists, allied health professionals, hospitals, and government agencies across Australia.

An innovative, cloud-hosted electronic health record (EHR) and patient management system (PMS), MediRecords seamlessly integrates administrative and clinical workflows, offers a single patient longitudinal health record, and provides best-in-class API and FHIR connectivity. Accessible via a web browser, MediRecords takes care of hosting, security, and software updates, allowing users to focus solely on patient care.

## Our integrations

MediRecords integrates with service providers to make it easy for healthcare providers to access relevant information and efficiently manage patient care.

-  eRx Script Exchange
-  Real time prescription monitoring
-  Wolters Kluwer Medi-Span
-  My Health Record
-  The Australian Immunisation Register
-  Medicare, DVA and ECLIPSE billing
-  CoviU telehealth platform

We offer secure FHIR (Fast Healthcare Interoperability Resources) and API integrations, along with SNOMED-CT-AU coded clinical terminology. If you want to make more of your data, MediRecords is your ideal technology partner.

## Key benefits

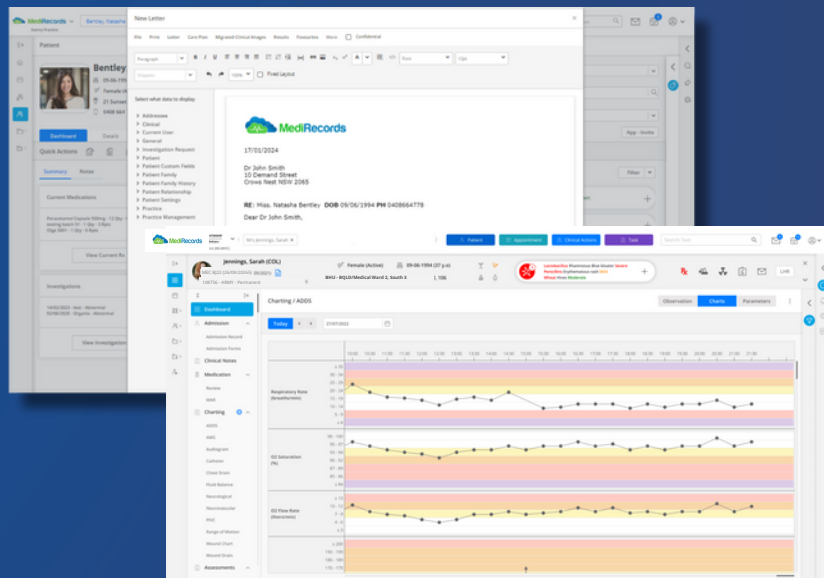

-  API connectivity
-  True cloud solution - No need for hardware, software installation or updates
-  Streamlined prescribing and investigation requests
-  End-to-end billing and claiming - reduce rejected claims
-  Work from anywhere you can access the internet
-  Ideal for telehealth and virtual care

## Our customers

# Smart technology empowering patient care

The MediRecords platform provides extensive health management capabilities designed to manage patients through every step of their healthcare journey.

## Appointments

Schedule and manage appointments, including group sessions

## Consent

Record consent for procedures, research and more

## Prescribing

Prescribe electronically or on paper with clinical decision support

## Assessments

Assess fitness for work and other key measures

## Correspondence

Create letters, referrals, medical certificates and more

## Recalls

View patient recall status on a single grid

## Case Management

Simplify information sharing for Care Teams

## Inpatient Management

Digitise charts, handovers and discharge notes

## Reporting

Drive efficiency with standard reports or secure data feeds

## Communications

Use real time chat and patient engagement tools

## Laboratory

Diagnostic test ordering and results processing

## Vaccinations

Manage vaccinations for individuals or your workforce

## Connected care with MediRecords

MediRecords is modular and highly configurable, supporting a diverse set of clinical and administrative use cases across multiple health care settings. A single patient longitudinal record sits at the centre of multidisciplinary care, no matter what the size and scale of the health service.
