# Support your clinicians with smart, cloud technology

MediRecords

Australian designed and built, MediRecords is an industry-leading, cloud-hosted electronic health record and patient management system.

MediRecords is a true cloud electronic health record (EHR) and patient management system trusted by general practitioners, specialists, multidisciplinary teams, government departments, and defence organisations.

Consisting of four key product pillars, Care, Connect, Engage, and Evolve, MediRecords integrates clinical and administrative workflows with a longitudinal patient record, provides FHIR and API connectivity, and manages hosting, security, and software updates for you.

Care

Care is our core clinical platform with patient records, ePrescribing, appointment management, billing, correspondence templates, and more.

Connect

Connect ensures industry-leading, secure data connectivity via FHIR, APIs, and business intelligence tools.

Engage

The Engage patient portal enables real-time patient communications through secure web access, for appointments, consent, assessments and tasks.

Evolve

Evolve is our suite of AI-powered tools, co-designed with clinicians to improve workflows, data entry, and enhance decision-making.

Key benefits

Industry-leading API connectivity for scalable and interoperable healthcare.

Built 100% in the cloud - no need for hardware, software installation or updates.

Access your clinical systems anytime, anywhere; ideal for remote teams and multi-site practices.

Our integrations

MediRecords integrates with service providers to make it easy for healthcare providers to access relevant information and efficiently manage patient care.

We offer secure FHIR (Fast Healthcare Interoperability Resources) and API integrations, along with SNOMED-CT-AU coded clinical terminology.
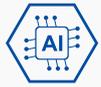

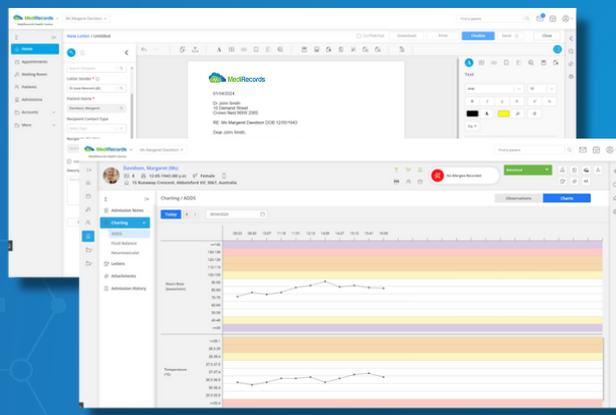

Our integrations include:

eRx script exchange   Wolters Kluwer   My Health Record   medicity

COVIU   heidi   stripe   snapforms

If you want to make more of your data, MediRecords is your ideal technology partner.

Designed with clinicians.
Built for better care.

The MediRecords platform provides extensive health management capabilities designed to manage patients through every step of their healthcare journey.

AI Patient Summary
Review a patient's past three consultations in seconds

Appointments
Schedule and manage appointments, including group sessions

Assessments
Assess fitness for work, along with other key clinical and wellbeing measures

Case Management
Simplify how information is shared and accessed across Care Teams

Centralised Billing
Manage payments across practices from one account

Communications
1-to-1 or group messages, sent instantly and securely

Consent Record
Consent for procedures, research, advance care planning and more

Correspondence
Create letters, referrals, medical certificates and more

In-app payments
Process payments directly within MediRecords via our Stripe integration

Inpatient management
Digitise charts, handovers and discharge notes

Laboratory
Generate diagnostic requests, and receive results

Prescribing
Prescribe electronically or on paper, with clinical decision support

Recalls
Review patient recall statuses with a single grid view

Reporting
Drive efficiency with standard reports or secure data feeds

Vaccinations
Manage vaccinations for individuals or workforce

Markets we service

- Addictions
