

MediRecords Engage

Introducing an innovative patient portal that streamlines healthcare management through a connected patient record. Our new web-based platform seamlessly extends your clinical workflows to include patients, fostering meaningful connections and driving improved health outcomes.

Why choose MediRecords Engage?

Enhanced patient engagement

Empower your patients to take an active role in their healthcare, leading to better outcomes and higher patient satisfaction.

Improved patient outcomes

Enhance communication with your patients, allowing you to assign clinical activities, educate on prevention and care planning and share documentation supporting their healthcare journey.

Improved practice operations

Optimise your practice by reducing administrative burdens, digitising manual processes and freeing up time to focus on delivering quality patient care.
